

The chart displays the evolution of the Cota index from 2000 to 2009. The Y-axis represents the Cota index, ranging from 52.0 to 58.0. The X-axis represents time, with specific points marked by vertical lines. Four scenarios are plotted: Prog (blue line), Cot (red line), and two unlabeled scenarios (green and yellow lines). The chart shows a general downward trend with several fluctuations. Key data points are labeled with Prog and Cot values and percentage changes between points.

Diagrama de un perfil de una vía de 5,60 m de ancho total. El diagrama muestra una sección transversal con una línea central de alineación proyectada. Las capas de la vía son: Pavimento de Hormigón (e=20 cm), Base granular cementada (e=15 cm) y Sub-Rasante. Las cuestas laterales tienen una pendiente superior al 1,0%. Las dimensiones horizontales de las cuestas son de 2,80 m cada una. Se indica una pendiente transversal de 2,86%.
